Series Flask ON

SPOTLIGHTS

Flask is a series of minimalist spotlights equipped with a high-quality integrated LED light source. The simple form of the spotlight is ideally suited to modern interiors. The new Flask ON model is designed for surface mounting. The luminaires have different heights, so you can successfully use them in rooms of different heights or create any compositions from them. The elongated arm makes them ideal for lighting an image or other selected element of the interior that we want to particularly highlight.

Spot lighting, complementary, ideal for business premises, galleries, offices and residential interiors.
